PROTECTING MICHIGAN'S K-12 SCHOOLS FROM CYBER THREATS

Michigan's schools face an increasing wave of cyber threats that disrupt education and compromise sensitive data. In 2023, the MiSecure initiative launched to provide schools with the tools and support they need to defend against cyberattacks.

WHY MISECURE MATTERS

MiSecure keeps Michigan's schools open and operational, preventing disruptions caused by cyberattacks. By safeguarding sensitive data and ensuring continuity of public education, the program builds trust within communities. It empowers schools with the expertise and tools needed to navigate an increasingly complex cyber landscape.

WHAT'S NEXT?

Looking ahead, MiSecure aims to expand protections to staff and student devices while developing statewide cybersecurity training programs. Plans also include creating shared firewall management systems to enhance collaboration and efficiency. Continued funding will ensure that Michigan's schools remain secure against evolving digital threats

$5.3 MILLION SAVED

Statewide MDR procurement reduced costs significantly for Michigan schools.

49 ISDS PROTECTED

Statewide MDR procurement reduced costs significantly for Michigan schools.

6 MAJOR INCIDENTS STOPPED

Ransomware and other threats prevented, ensuring no school closures or data breaches. 403 critical or high priority detections November - February.

24/7 SUPPORT

Expert-staffed SOC delivers continuous monitoring, guidance, and incident response for districts during cyber events and incidents. Additional leadership helps schools to proactively assess and prepare for potential incidents.
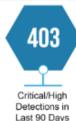

19,703 ASSESTS PROTECTED

Due to tremendous savings, districts have protected thousands of workstations in addition to thousands of servers.

49	94	19,703	4,275	403
Intermediate School Districts	Unique Instances (CIDs)	Devices	Servers	Critical/High Detections in Last 90 Days
